PROJECTS

ITTOOLS

[21/03/2022 – Current]

I developed a full stack web application called ITOOLS for Innova Service Delivery Unit all by myself. I did everything from scratch. By saying scratch I mean from designing pages in Figma all the way up to the deployment and maintenance. I used React for the frontend side, Express.js(Nodejs) for the backend side. I also used the SQL server as a database and IIS for the deployment process. ITOOLS has been in use since January 2023. It has over 100 users and most of them are using the system daily.
